1. Where is Canada most thinly populated?
2. Which area is most densely populated?

3. Name two other highly populated areas. How do these highly populated areas relate to the location of Canada’s main urban centers?

4. How accurate is it to say that Canada’s population is mainly concentrated along the US/Canada border (islands of population—Archipelago)

5. Why can’t you only examine population density when studying population distribution (see Canada vs Netherlands example on page 44)
